BUSINESS STRATEGY REPORT USING QUALITATIVE & QUANTITATIVE ANALYSIS

Task 1: Company introduction

Overview:

Meesho was founded in 2015 by Vidit Aatrey & Sanjeev Barnwal.

Headquarters: Bangalore

Domain: Social Commerce / E-commerce

Growing Due to:

- Rise in smartphone usage in India,
- Expansion of Tier 2 & Tire 3 markets
- Demand for Low – Cost products

Products/Services:

- Fashion (Menswear, Womenswear, Kids wear)
- Home & Kitchen Products
- Beauty & accessories

Target Customers:

- Price – Sensitive users
- Small resellers (especially Women Entrepreneurs)
- Tier 2, Tire 3, and Rural Customers

Task 2: Business Model Analysis

Revenue Model

- Commission from sellers
- Logistics & delivery chargers
- Advertising fees from sellers

Cost Drivers

- Logistics & Supply chain
- Marketing (Digital ads, offers)
- Technology platform maintenance
- Customer acquisition cost

Value Delivery

- Enable Resellers to earn without inventory
- Offers low – cost products directly from manufactures
- Simple mobile app for buying & selling

Task 3: Unique Selling Proposition (USP) Identification

Introduction

Meesho has created a unique position in the Indian e-commerce industry by targeting price-sensitive customers and small resellers, especially in Tier 2 and Tier 3 cities. Its business model differs from traditional e-commerce platforms like Amazon and Flipkart.

Key Features that Differentiate Meesho

- Zero investment reseller model
- Focus on non-metro and rural markets
- Affordable pricing strategy
- Large collection of local and unbranded products
- Cash on Delivery (COD) availability

Why Customers Choose Meesho

Customers prefer Meesho because:

- Products are available at very low prices
- Easy earning opportunity through reselling
- Simple mobile application interface
- Wide variety of fashion and household products

Branding & Customer Experience

Meesho promotes the concept of "Earn from Home," which attracts women entrepreneurs and small resellers. Its simple app design helps first-time online shoppers use the platform easily. Referral-based marketing also helped the company grow rapidly.

Task 4: Market Gap & Customer Need Analysis

Introduction

Before Meesho entered the market, many small sellers and resellers lacked access to affordable online selling platforms.

Market Pain Points

- Small businesses had no online marketplace access

- High investment requirements for inventory
- Strong competition from Amazon and Flipkart
- Limited opportunities for women entrepreneurs

Problem Solved by Meesho

Meesho connects manufacturers, resellers, and customers through a simple online platform. It removes the need for inventory investment and allows resellers to sell products using WhatsApp and social media.

Customer Benefits

- Additional source of income
- Affordable online shopping
- Easy product discovery
- Business opportunity without capital investment

Task 5: Technology & Innovation Study

Introduction

Technology plays a major role in Meesho's operational efficiency and customer experience.

Technology Elements Used

Mobile App Features

- Easy product listing
- Cash on Delivery (COD)
- Order tracking system

AI & Data Analytics

- Personalized recommendations
- Demand forecasting
- Customer behavior analysis

Logistics & Supply Chain

- Integrated logistics partners like Delhivery and Ecom Express
- Automated order allocation system

How Technology Improves Business Performance

- Faster order management
- Improved customer satisfaction

- Better product recommendations
- Reduced delivery delays
- Efficient inventory and logistics management

Innovations Introduced by Meesho

- Inventory-free reseller model
- Social commerce integration
- AI-based product suggestions
- Simplified mobile shopping for rural users

Task 6: Customer Review & Sentiment Analysis

Introduction

Customer reviews help identify satisfaction levels and business improvement areas.

Sentiment Classification

Positive Reviews

- Affordable products
- Good earning opportunities
- Wide product variety

Negative Reviews

- Delivery delays
- Poor product quality
- Refund and return issues

Neutral Reviews

- App performance is average
- Mixed experiences with sellers

Sentiment	Common Themes
Positive	Low prices, reselling opportunities, variety
Negative	Delivery issues, product quality concerns
Neutral	Average app performance, mixed service experience

Task 7: Competitor Benchmarking

Introduction

Meesho competes with major e-commerce companies such as Amazon, Flipkart, and Myntra.

Competitor Comparison

Factor	Meesho	Flipkart	Amazon	Myntra
Delivery Speed	**Medium**	**Fast**	**Very Fast**	**Fast**
Product Variety	**High (Unbranded)**	**High**	**Very High**	**Fashion Focused**
Pricing	**Very Low**	**Moderate**	**Moderate**	**High**
App Experience	**Simple**	**Advanced**	**Advanced**	**Premium**
Customer Satisfaction	**Medium**	**High**	**Very High**	**High**

Key Differences

- Meesho focuses on affordability
- Amazon leads in customer satisfaction
- Myntra specializes in fashion products
- Flipkart offers strong delivery performance

Task 8: SWOT Analysis

Introduction

SWOT analysis helps identify Meesho's strengths, weaknesses, opportunities, and threats.

Strengths	Weaknesses	Opportunities	Threats
Low-cost platform	Product quality issues	Growth in Tier 2 & 3 cities	Strong competition
Strong reseller network	Delivery delays	Expansion into new categories	Price wars in e-commerce

Large product range	Weak brand perception	Rising digital adoption	Logistics challenges

Task 9: Key Insights & Findings

Major Strengths

- Affordable pricing attracts customers
- Strong reseller ecosystem
- High product variety
- Growing rural market presence

Major Problem Areas

- Product quality inconsistency
- Delivery delays
- High return and refund rates
- Customer service challenges

Data-Based Findings

- Positive reviews mostly mention low pricing
- Negative reviews mainly focus on delivery and quality issues
- Logistics performance directly impacts customer satisfaction

Task 10: Strategic Business Recommendations

Introduction

To improve business performance, Meesho should focus on operational efficiency, customer satisfaction, and competitive growth strategies.

Short-Term Recommendations

- Improve product quality control
- Strengthen logistics and delivery systems
- Faster refund and return processing
- Improve customer support services

- Better product descriptions and listings

Long-Term Recommendations

- Build strong private-label brands
- Invest in AI and personalization
- Expand supply chain infrastructure
- Enter new product categories
- Introduce seller training programs

Expected Business Benefits

- Higher customer satisfaction
- Reduced return rates
- Better brand reputation
- Increased customer loyalty
- Sustainable competitive advantage

Conclusion

Overall, Meesho has emerged as a successful and innovative e-commerce platform by offering affordable products, empowering small resellers, and focusing on Tier 2 and Tier 3 markets in India. The company's zero-investment reseller model, simple mobile application, and strong pricing strategy have helped attract a large customer base and create new income opportunities for small entrepreneurs. The study identified major strengths such as low pricing, wide product variety, and strong reseller support, while also highlighting challenges including product quality issues, delivery delays, and increasing competition from Amazon and Flipkart. Customer reviews show that affordability is the biggest attraction, but improvements are needed in logistics and customer service. With better quality control, stronger supply chain management, and continued investment in technology and innovation, Meesho has strong potential for sustainable growth and long-term success in the Indian e-commerce industry.
